Doubtless, some people go around looking for charity because of what it is supposed to cover.

TAFT AND TARIFF REVISION

HOT SPRINGS (Va.), August 22.—Just what are Taft views regarding the revision of the tariff were incidentally expressed by him today.

"If elected," he said, "I shall call the Sixty-first Congress together in extraordinary session to revise the tariff at the very earliest moment I have authority to do so. I consider such action to be my obligation under the tariff plank of the Republican platform."

Bryan's recent tariff speech has not reached here, and the above statement was made without reference to what the Democratic nominee has said on the subject, but in answer to a query as to how Taft interpreted the Republican tariff plank.

Taft made it known here today that he will stop for two hours at Athens, O., next Saturday on his way to Middle Bass Island, where he is to fish for a week. The Athens visit, is at the urgent invitation of former Representative Grosvenor, whose guest Mr. and Mrs. Taft will be for luncheon. The opportunity also will be taken to present the candidate to the members of the county organizations of veterans of the Civil War and the Spanish-American War, who will be in session at Athens on that day.

"I shall probably make a speech to the veterans," said Taft, "but it will not be a political speech; simply an address of courtesy such as the occasion warrants."

The Taft party will reach Athens shortly before noon Saturday, and will make the seven-hour run to Put-In-Bay during the afternoon and evening.

Postmaster-General Meyer came here today for a week-end visit with Taft and allowed himself to be quoted in this statement: "I believe Governor Hughes will be renominated."

Meyer, who at the recent Oyster Bay conference on the New York situation, indicated that he based his opinion on information gathered there, although he said President Roosevelt's intention was to take no action in the matter.

"It is a political situation which I believe will work itself out naturally," he said.

Gifford Pinchot, chief of the Government forestry bureau, made a report to Taft on conditions in the West. He said for publication that he had brought to the Virginia mountains a fine collection of rainbows.

Theodore P. Shonts, president of the Interborough - Metropolitan Railway system of New York and president of the Chicago and Alton, came here today on his way West. Before leaving New York Shonts placed an order for 500 freight cars for the Alton, news of which was stated as an indication of his views of the business situation of the country. His call upon Taft, was stated, was simply a personal one.

Richard C. Sprott, son of W. A. Sprott, division freight agent of the Wabash and the Wheeling & Lake Erie railroads, since he enlisted in Uncle Sam's navy two years ago, has written some clever letters to his father and other relatives in Toledo. He is an observing young man and his descriptions of what he sees while knocking about the world are interesting and instructive. Richard is now doing duty on the United States battleship Louisiana and his latest letter to his father bears the Honolulu postmark and date of July 22. The young writer says, in part:

"It was by accident that I went ashore yesterday, but inasmuch as I went it is up to me to tell you that I had a fine liberty and that Honolulu is a beautiful place. I didn't get a chance to see all the places of interest, as we only had leave from 1 p. m. to 1 a. m. I took a car ride out to the ball park first. It is the finest diamond I have ever seen and has the New York polo grounds backed off the board. Everybody plays ball out here. There is an island league composed of teams made up of Japs, Chinese and Hawaiians. The American team here is not a leader in the league. The Japs hold the honors.

"All car service is free, for enlisted men. I took in the 'Punchbowl,' an active volcano crater, and walked back to Waikiki for a swim. There is the place you see the surf riding, for which the natives here are renowned the world over. Some ride the surf on boards about four feet long, and others use what is called the out-rigger, which is a canoe-like boat, with a boom rigged out one side. The swell starts to break about 400 feet from the beach and the water from the beach out about 50 feet is churned to a sea of froth. These points the men use seem to ride from the crest of one breaker to the next and the constant wash of the breakers shoves the boat along at a tremendous speed, so that when nearly to the beach they are traveling at the rate of about forty knots an hour. It is great sport to watch them.

"I also took in the aquarium. It has a beautiful assortment of deep sea fishes of rare varieties which I had never before seen. No painter could depict one of the butterfly fish. The fish looks to be about as thick as ordinary wrapping paper, and a butterfly is a plain looking thing compared with the colors of these fish.

"Towards evening I went out to the Hawaiian Pineapple Company's plant. It is known as the largest pineapple canning factory in the world—they don't do anything but can pineapples there. One of the foremen took us around and showed us the whole works. We filled up on pine. They eat pineapples here like we eat oranges. They are large, the biggest I ever saw. The one the fellow broke for us tipped the scales at ten pounds and a quarter. He says it was only an ordinary sized pine. The capacity of the plant, I was told, was 36,000 pounds daily. Before we came to this island I used to wish I could sit down to a big bowl of pineapple like mother used to make, sliced, with sugar sprinkled over the top, about three hours in the ice box, you know, but one of these big juicy pines, so ripe that they are squishy, are sweet and the finest things you ever ate.

"A big fight was pulled off in the early part of the evening that we took in. The champion heavyweight of the fleet and the champion native islander mixed it up, but the islander was too fat and nearly got killed. There was a big farewell ball at the Sea Beach Inn for officers and men, where I finished the evening. The dance floor is built under the trees and palms—no roof, but native orchestra music. I met some sweet Kanaka girls and danced

address of courtesy such as the occasion warrants."
